IRMA DISTRICT SCHOOL REPORTS

PROMOTIONS FOR SENIOR ROOM IRMA PUBLIC SCHOOL

Grade VII.—Anna Peterson 79, Jas. Fleming 79, Clifford Smallwood 78, Robert Maguire 71, John Schenert 68, Grade VI.—Vera Hatch 88, May Jones 85, Mike Guitler 74, E. S. Scimion 71, Clarence Barber 69, Bessie Sharkey 68, Dorothy Glasgow 67, Stanley Guitler 65, Sam Congdon 64, Mary Stinson 59, Ina Mathison 57.

Grade V.—Nina McGregor 91, Geo. King 80, Rae Locke 80, Jack Peterson 75, Ted Thurston 73, Dolan Herbert 71, Harold Coe 69, Forest Coe 68, Ralph Schenert 66, Leslie Robertson 56, Leo Briault 55.

Grade VI.—Mary Stinson failed in History.
Grade V.—Bessie Maguire, Leo Briault, Leslie Robertson, failed in History.
—Florence McDowell, Teacher

PROMOTION TESTS GRADES I TO IV. IRMA JUNIOR ROOM

No days taught — 203.
(The first number is the number of days attendance, the second is the average. The names are arranged according to standing in class.)

Grade IV. — Honors.
James Mathison, 202, 84.8;
Altha Knudson, 203, 82.7.
Ina Mathison, 199, 82.5.
William Milburn, 194.5, 82.2.
Albert Glasgow, 194.5, 78.1.

Special Mention.
Ralph Congdon, 180, 73.8.
Orville Wright, 173, 73.6.

Pass:
Roy Lattner, 170.5, 64.
Harold Barber, 150, 58.3.

Grade III B.

Honors—Roy Blade 131, 80.3; Fern Stinson 133.5, 74.6; Robert Guitler 133, 76.5; Fredrick Thurston 133.5, 75.3; Lois Coe 133, 75.3.
Special Mention — Ernest Briault 140.5, 67.1; Eileen Robertson 190.5, 67.

Grade III B.

Special Honors — Arthur Charter 160, 87.8.
Honors — Ethel Tate 200.5, 83.5; Yvonne Asquin 168, 79.5; Marion Thorpe 165.5, 79; Clarence Charter 179.5, 78; Kathleen Overhout 71, 76.4; Rosie Sharkey 176, 75.1.

Special Mention — Arthur Knudson 87, 72; Mildred Hill 153, 68.4.
Pass — Gannar Larson 188, 60.2.

Grade II B.

Special Mention — Eda Briault 132.5, 75.7.
Pass — James Sharkey 139, 65.

Recommended — Harry Lattner 161, 57.5; Clarence Larson 185.5, 50.8.

Grade I A.

Honors — Louise Barber 192, 81.2; Ronald Thurston 164.5, 80.6; Norman Campbell 156, 80.2; Percy Congdon 178, 76.4; Arthur Peterson 155, 76.4; Clifford Jones 146.5, 76.4; Doreen Hatch 140.5, 75.3; Harvey Guitler 151, 70.8.

Special Mention — Leslie Larson 51, 65.8; Eldon Herbert 128.5, 65.2.

Grade I B.

Alphonse Briault 151, not promoted; George Lattner 150, not promoted.
No children in room — 42.
No children with Honors — 25.
No children Special Mention — 9.
No children with pass — 4.
No children recommended — 2.
No children not promoted — 2.
Special Honors — Over 85.
Honors — 75 to 85 per cent.
Special Mention — 65 to 75 per cent.
Pass — 58 to 65 per cent.
Recommended — 50 to 58 per cent.

Prizes Awarded during Year.

Hygiene—Norman Campbell, Louise Barber, Harold Barber, Ina Mathison, Ethel Tate, Altha Knudson, Fern Stinson, Alphonse Briault, Lois Coe, Doreen Hatch.
Star Roll — Arthur Peterson (2), Ethel Tate (2), Rosie Sharkey, Louise Barber (2), James Sharkey, Eda Briault, Fern Stinson, Altha Knudson, William Milburn.

Highest rank in Promotion Tests — James Mathison IV, Roy Blade III A, Eda Briault II B, Ethel Tate II A, Bobbie Charter (highest in room).

Lois Barber I A.
Perfect Attendance — Louise Barber, Clarence Carter, Eileen Robertson, James Mathison, Ina Mathison.

NEWS ITEMS FROM KINSELLA

Mr. and Mrs. Allen motored to Killam on Thursday and spent the day. Mrs. Lund of Viking is visiting her daughter Mrs. P. J. Wangness. Mr. and Mrs. M. Nance left for their holidays last Friday.

Mrs. Lee and daughter returned from Edmonton on Friday. Do not forget the Tea and Sale of Aprons in the Church on Saturday, July 7th by the Ladies Aid.

Mr. Ben Wacher of the B. & B. gave last Sunday with his family here.

Miss Chisholm and nephew Master Lloyd Peacock of Saskatoon are visitors at the R. Cornack home.

Mr. and Mrs. Homer of Otarlo are visiting their daughter Mrs. Frank Murray.

Mrs. Fred Affeck and daughter motored from Edmonton on Friday and are securing the Lofth cottage. Mr. Affeck is working in the gravel pit.

The Misses Kathleen and Evelyn Rodd of Edmonton spent Friday and Saturday with their father at the gravel pit.

Mrs. Thorson and children left Monday to visit Mr. and Mrs. Yavie and from there will go to visit Mr. and Mrs. Fred Thorson at Dolman, Sask.

Miss Snogard and niece who have been spending the past two months with the former's brother, left for their home in Minn., on Friday last.

Mr. Lockhart had a sale on Saturday of some of his household goods, cattle and horses. Mr. Lockhart and family left for home on Sunday for their new home at Edson.

Mrs. D. Corbett, daughter Edith and son Jack, were in Verreux last week attending the graduation of the former's daughter Evelyn, who has been training for a nurse.

On Saturday evening three head of cattle were killed at the East crossing by the Confederation train, one being killed outright and the other two had to be killed.

The induction service for the Rev. McNeal which was to have been held in the Kinsella church on Wednesday evening, July 4th, has been postponed indefinitely on account of serious illness of Rev. McNeal's family.

Mr. and Mrs. Fred Anderson and two sons of Winnipeg are visiting his brother William Anderson and wife.

Miss Bessie Hall, clerk at P. J. Wangness is spending her holidays at Jarow and Sedgewick.

School closed on Friday, Miss Torson leaving for her home in Edmonton on Saturday morning and Miss Dora Echert returned home with her for a short holiday. Miss Larnie leaving on Monday for her home at Seba Beach. Both teachers have been engaged for another year.

ORANGE CELEBRATION 12th JULY AT IRMA

Among the speakers on the 12th of July, the following are expected to give addresses:

The Rev. Dr. J. E. Duglos of Banville.
Rev. Norman Whitmore, of Wainwright.
Rev. J. Woolatt of Edgerton.
Rev. McNeal of Jarow.

A dance will be held in the new Hall at Irma on the night of July 12th to finish up the Orange Celebrations.

IRMA STORES WILL CLOSE THURSDAY, 12th JULY

The Irma stores will close on Thursday 12th July instead of Wednesday, 11th of July on account of the Orange Celebration.

REPORT OF ROSS SCHOOL TERM ENDING JUNE 29, 1928

Grade VII. to Grade VIII.—Raymond Stinson, average 72.
Grade VI. to VII.—Bertram Nicoll 83; Leola Nash 83; Clayton Peterson 71.

Grade V. to VI.—Mary Kennedy 75.

Grade IV. to V.—Olive Larson 85.
Grade III. to IV.—Hazel Nicoll 79.
Grade II. to III.—William Nash 81.
Allen Anderson 79; Albert Larson 76; Ellen Anderson 74.

Grade I to II.—Gladys Larson, Ralph Mark, Mary Burns, Fred Burns, Grade I. Just Beginners—George Archibald, John Archibald, Robert Burt.

—Alma G. Miles, Teacher.

CHURCH NOTICES AND ACTIVITIES

CHURCH NOTICES

The Irma L. O. L. will parade to the United Church for Divine service at 8 p.m. The pastor will deliver a sermon to the members of the Order. Everybody welcome.

Other services will be —
Alma Mater—2 P.M.
Sunday School—3 P.M.
Roseberry—2:30 P.M.

Do not miss the dinner and supper given by the Ladies Aid at Orange celebration on Thursday, July 12th.

SUNDAY SCHOOL Summer Attendance—Recognitions on Rally Day.

The first Sunday of July last year, thirty-five attended Sunday School. This year there were seventy-three, more than twice the number. Rally day is in September and on that day the percentage attendance of each class will be read and special recognitions will be given the class reporting the highest attendance, also the names of individual pupils standing highest will be announced.

We are glad our efficient secretary is having a vacation, all the same, we miss her.

The Sunday School executive had a good time at the supper meeting on the verandah of the hospitable home of Mr. and Mrs. Locke.

The Sunday School Mail-Bag.
A weekly Sunday School holiday mail-bag will be placed conspicuously over the platform in the church. All who are going away for even a Sunday's absence are asked to post a card stating where they are and when they will return, also if they are attending Sunday School or if unable to attend, studying the Sunday School lesson. The Secretary will read the messages each Sunday and the class represented by the absentee will stand during the reading.

Sunday School Library

The Irma Sunday School wishes to thank Mr. and Mrs. Fred Higginson for the fine collection of forty books they donated. More are expected from other homes this week and it is hoped that by July 15th—World's Sunday School day—books will be loaned to those in attendance at 11 A.M. A Librarian has already been appointed.

TEN YEARS AGO

From Irma Times, July 5th, 1918.
Drilling was resumed after two years delay at the Viking and Battle River well south-east of Irma.

Mr. W. Benedict purchased the south half of Section 19-168-4-1.

Mr. S. G. Chamberlain, of Edmonton was visiting with Mr. T. Yare.

Pte. B. S. Edwards was home on leave.

Potatoes were selling at \$1.50 per bushel and eggs were 30c per dozen.

FIVE YEARS AGO

From Irma Times, July 6th, 1923.
The Irma Oil Development Co. was preparing to drill at Irma.

The Imperial Oil Co. started a new well on Section 14-45-8-1, near the Battle River Bridge.

Contractors commenced laying gas pipe from Viking to Edmonton.

Mr. James Hedley moved his pool room and barber shop to the present location.

Mr. John Ross, of Alexandra, Ontario, was visiting his daughter Mrs. Angus McMillan.

Mr. and Mrs. Fred Higginson, were in Edmonton.

Mr. and Mrs. C. G. Purvis and son Stewart left on the special train Wednesday morning. This is a personally conducted tour which the Canadian National features each year, and stops at all the principal points along the line until reaching the coast. Part of the trip is by boat from Prince Rupert to Vancouver.

NOTICE TO ORANGEMEN

All Orangemen are requested to attend at the Lodge Room on Sunday July 8th at 7:30 P.M. to attend the annual Church Parade.

ANNOUNCEMENT

Moore's Merry Makers Orchestra of Irma wish it to be known that they are now disbanded indefinitely and are accordingly cancelling all future engagements.

The Orchestra wishes to thank their numerous friends and patrons for their co-operation in making the past season a success. Moore's Merry Makers, per H. T. Eloff, Sec-Treas.

HOMESTEADERS MAY RE-FILE

HOMESTEADERS MAY MAKE NEW LAND FILINGS

Changes in the regulations governing homesteads by which it will be possible for those who secured patents on or before January 1st, 1925 to again file for a homestead have been announced from Ottawa and are now in the Edmonton land office. The new regulations are expected to start another rush into the Peace River area, as many farmers who are on proved up homesteads in other districts will now be able to get into that section, although previously prevented from doing so.

No application for second homestead entry will be accepted without the production and surrender of a letter of authority from the Land Administration office of the Department of the Interior. Persons making inquiry as to whether they come under the provisions of the amendment are to submit an application to the Commission of Dominion Lands, Ottawa, setting forth the land for which patent was obtained as a first homestead, describing same by section, part section, township, range and meridian.

FACTS ABOUT THE CANADIAN BIBLE SOCIETY

The Bible Society, known more fully as the British and Foreign Bible Society and in Canada as the Canadian Bible Society, is in the 125th year of its history. It was founded in the year 1801 for the purpose of promoting the wider circulation of Scripture. This is its sole object. It is a Bible-translating, Bible-printing, Bible-distributing organization, serving all churches without distinction, helping them especially on their mission fields to give to all peoples the Holy Scriptures in the mother tongue of each, and at a price, that the poorest can afford to pay.

When the Bible Society began its work the Bible was printed, in 72 languages; now it is printed in over 850 languages; the parent Society itself having 608 of these to its credit, and the American Bible Society, a daughter institution, making up most of the balance. New versions are being added at a rapid rate. In the space of 12 months, between April 1st, 1927 and April 1st, 1928, no less than 15 of these new versions were added to the Society's list. That means a new language every 24 days. The rate of increase for the past 25 years have been more than one new language every six weeks. The number of copies issued yearly is about ten million, no copy being less than one complete book of Scripture, and the total number of copies issued by the Society since its organization has reached almost the 400 million mark. The Society in Canada meets every immigrant ship coming to the country and offers each person a gift of Scripture. Out of 70,000 such immigrants landing at Quebec, 60,000 persons are contented the Society's gift. Then in every province of Canada it seeks to reach the remotest settlements that every home may have at least one copy of the Great Book to whose influence we can trace our security of life and property, our freedom of speech and our liberty of worship.

The Bible Society is a partnership of Christians from many churches. It welcomes the gifts of those who wish to promote its work. Further information about the work may be obtained by writing to the headquarters for North America, The Bible House, 9939 Jasper Ave., Edmonton. Branch organizations may be found in every town and almost every village. All local ministers are members of this local Bible Society organization and will gladly discuss the work of the Society with those who wish to know more about it.

Wedding Bells

VENSTOR — BERG

A quiet wedding took place at the United Church manse on Tuesday afternoon, June 26, 1928, when Mr. Paul Venstob, of Viking and Miss Mabel Berg, also of Viking, were united in matrimony. Rev. M. S. Kerr officiating. The bride was accompanied by Miss Anna Sather of Woodglen, Alberta, while Mr. Benjamin Sather supported the groom. The happy couple will make their future home at Viking—Camrose Canadian.

The bride is the daughter of Mr. and Mrs. T. T. Berg of this place and has grown up in this community. She has been employed as stenographer at the farmers' creamery for the past three years where she has made a host of friends by her gracious manner and pleasing disposition.

The groom is a rising young man of this community and is employed at the Kelly hardware. The newlyweds have the best wishes of all as they set sail on the sea of matrimony.

CAR FOR EVERY NINE PERSONS IN ALBERTA

Alberta has 11.0 passenger automobiles per hundred of population or approximately one car to every nine men, women and children in the province, according to figures issued from Ottawa during the past week. In this respect Alberta stands fourth among the provinces of the Dominion, Ontario leading with 12.1 cars per hundred of population and Saskatchewan and British Columbia following with 11.1 per hundred. Corresponding figures for the other provinces are: New Brunswick, 5.4; Nova Scotia, 4.8; Prince Edward Island 4.7, and Quebec 3.8.

The Secretary of the Irma Agricultural Society is mailing out the prize lists for the Irma Fair to be held August 14th and 15th. The directors are anxious to make this the biggest and best fair ever held in the Irma district. Get a prize list and see how large an entry you can make.

Mr. W. Masson and family spent the holiday with his parents north of Manville.

Most of the Irma citizens spent the holiday at Viking or Wainwright. On account of the extra attractions that was advertised for Wainwright, a circus and a flying machine, Wainwright drew the largest crowd. Most of the reports we have say the circus was disappointing and the flying machine never arrived. However the sports were good and we believe everyone enjoyed themselves.

Signs Of A Better Era

The period of prosperity now so generally prevalent throughout Canada and the United States, and the marked rise in industrial activity in all lines all over this continent, and which is being felt to a steadily increasing extent in Great Britain and other European countries, seems to present to some ill-informed minds and agitators an opportunity to once again revive the old "strike" weapon. When times are hard, business depressed, with large numbers of men unemployed and anxiously seeking work, the agitator urging men rejoicing in employment to "strike" has a hard row to hoe, but when business is brisk, the vast majority of men employed, and an increasing demand for labor, the agitator sees his opportunity to make trouble.

Fortunately, both employers and employees have learned from past bitter experiences that industrial warfare does not pay, any more than does war between nations; that the victor suffers almost as great damage as does the vanquished; and the general public who after all is the greatest sufferer is now more and more inclined to sternly oppose the calling of a "strike."

Relations between the bosses on the one side and the men on the other have been bettered and become more cordial in recent years through a realization of a truth, which ought to have been recognized long ago, that, in the final analysis, their interests are common. Employers today do not regard their men as mere machines, but as real and active partners in the success of the business in which they are jointly engaged, and the average workman today recognizes that his employer has huge problems and difficulties to face in successfully administering and maintaining his business in a highly organized and merely competitive world.

Recently an attempt was made to induce all the employees of the Toronto Street Railway system to go out on strike to enforce a series of demands made by them. To the up the strike; railway system in a city like Toronto would be a public calamity, resulting in great inconvenience to everybody and an enormous loss to the entire community. The Toronto street railway is not exclusively owned, that is, it belongs to all the people. The management pointed out that to meet the men's demands would necessitate an increase in fares. This brought the issue right home to every resident, and particularly to all classes of workmen in the city who are among the principal users of the cars. Had the system been privately owned, people would probably have felt that any increased expense to meet the men's demands could be met out of profits, and that any increase in fares was unnecessary, but in a municipally-owned system, operated to provide service rather than to accumulate profits, the statement of the management was accepted not as a bluff, and that either increased fares, or operating deficits to be made up out of increased taxes, must result.

So, when the matter of calling a "strike" finally came to a vote of the street railway employees, the men themselves rejected it by a ten to one vote in favor of arbitration, a very healthy indication of sane thinking on the part of the men and of the present trend of public sentiment.

Another Toronto labor incident may be cited as indicating the newer, had more reasonable point of view now actuating labor men. Structural steel workers on three of the largest buildings in the city went on strike to compel their employers to establish a closed shop and employ only union men, which would be a reversal of the Company's policy during the last forty years of making no distinction between union and non-union men but treating them all frankly and alike. The steel workers have sought to induce other branches of the building trades to go on strike in sympathy with them, but without success, and even the International Union, it is understood, refuses to endorse the attitude of the strikers.

The fact is becoming increasingly evident that in this age the bludgeon methods of war are growing more and more in disfavor, no matter in what direction or cause they may be employed. People are becoming more insistent all the time that causes of dispute, whether between nations, or in the industrial arena, or between individuals, be settled through the orderly processes of law and arbitration, and not by flying at each other's throats and engaging in combat in which countless thousands of absolutely innocent persons are made to suffer.

Alberta's Coal Resources

Official Figures Place Total At Over a Billion Tons

An estimate of Alberta's coal resources, made recently by the International Geological congress, places the total at 1,435,629 million tons, according to figures received by the provincial government. This is 14 per cent. of the world's coal supply, 72 per cent. of the British Empire's resources, and 87 per cent. of Canada's resources.

The mines presently operating in Alberta are capable of producing 15,000,000 tons annually, and it has been estimated that if this production

HE DIDN'T THINK DYSENTERY COULD BE RELIEVED

Mr. John Molling, Penner, Alta., writes: "I am a returned soldier, and when I came home from overseas I suffered greatly with dysentery. The doctor said it was chronic and did not think it could be relieved. However, he doctored me for quite a while, but did me no good. One day a druggist asked me if I had ever tried

"On his recommendation I bought a bottle and after I had taken it got some relief, so I got two more, and have never had the dysentery since 1925."

Put up only by The T. Milburn Co., Limited, Toronto, Ont.

W. N. U. 1739

tion were increased 100 times, that the available supply would not be exhausted for 18 centuries.

A Non-Inflammable Fuel

Invention of Russian Engineer Has Been Successfully Demonstrated

Fire prevention in the aeroplane is still a problem of the greatest importance. One solution lies in the production of a non-inflammable fuel which can be utilized in the present conventional type of aircraft engine.

A Russian engineer, Makonine, is reported to have achieved success in this direction. By a secret chemical process he is able to convert heavy mineral and vegetable oils into a light liquid fuel which is non-inflammable outside the engine. It can be used in the ordinary carburetor-type internal-combustion engine and will deliver more power for a given weight. These claims are said to have been demonstrated by a variety of official tests.

First Surgeon—"Are you going to operate on this patient?"

Second Surgeon—"I'm afraid to; there's something the matter with him."

Grapes grown in Holland and Belgium can be sent by water to London at a much lower cost than similar fruit grown in the south of England can travel by rail.

The physical and mechanical properties of Sitka spruce and its availability in long straight-grained pieces have made it the most valuable timber for aeroplane construction.

An enemy knocks a man down, then a friend proceeds to kick him.

For Hay Fever—use Minard's.

Obtains Second Place

Blind Student At Bramford Success-
ful In Essay Contest

Obtaining second place among 200,000 contestants all over the Dominion in a recent essay contest, a blind boy student at Ontario School for the Blind, Bramford, will receive congratulations of the acting minister of education, Hon. W. H. Price, conveyed by Dr. A. H. U. Colquhoun, deputy minister, to Supt. Race, Ernest Phipps, writing upon the subject, "Laura Secord, the Woman Who Made Confederation Possible," attained the highest place in the contest. In this large field, and in addition, three other pupils of the school received special prizes.

RHEUMATIC PAINS DUE TO THIN BLOOD

Relief Comes Through the Use

Of Dr. Williams' Pink Pills
The most rheumatic sufferer can hope for in rubidium something on the swollen, aching joints is the relief, and all the while the trouble is becoming more firmly rooted. It is now known that rheumatism is rooted in the blood, and that as the trouble goes on the blood becomes still further thin and watery. To get rid of rheumatism, therefore, you must go to the root of the trouble in the blood. That is why Dr. Williams' Pink Pills have proved so beneficial when taken for this trouble. They make new, rich blood which expels the poisonous acid and the rheumatism disappears.

There are thousands of former rheumatic sufferers in Canada, now well and strong, who thank Dr. Williams' Pink Pills that they are now free from the aches and pains of this dreaded trouble. One of these, Mrs. W. F. Tait, McKellar, Ont., who says: "I am one of the willing ones to tell you of the great benefits I received from the use of Dr. Williams' Pink Pills. After lying in bed for seven weeks suffering untold agony with inflammatory rheumatism, relief finally came through the use of this medicine. I could not move, bed only in my life, and I could only sleep when opiates were given me. The medical treatment I was taking seemed of no avail. Then I was advised to try Dr. Williams' Pink Pills, and soon I began to get relief. After taking six or eight boxes the rheumatism was banished and I had never felt better in my life. It is several years since this happened and I have had no return of the trouble since. I may add that I recommended the pills to two of my friends who were suffering with rheumatism and the pills were equally effective in both cases."

Try Dr. Williams' Pink Pills for anemia, rheumatism, neuralgia, indigestion or nervousness. Take them as a tonic if you are not in the best physical condition and cultivate a resistance that will keep you well and strong. You can get these pills through any medicine dealer or by post at the box from The Dr. Williams' Medicine Co., Brockville, Ont.

In England and Scandinavian countries traffic keeps to the left; in most other European countries, to the right, according to the National Automobile Club.

A primitive people have been discovered a few hundred miles south of the Mediterranean, living in holes in the ground.

Let Gum-Dipped Tires Save You Money

Only in Firestone tires can you get the advantages of the exclusive Firestone Gum-Dipping process by which every fibre of every cord is insulated with rubber which prevents internal heat and friction—the greatest enemy of tire life.

This is the reason why Firestone tires give thousands of extra miles. They cost no more than ordinary tires. See the nearest Firestone Dealer.

RED CROSS AS FAIRY GODMOTHER

A Radio Tale Of The Far North
Of Alberta

In the far north of Alberta stands a little house in the woods, looking like Wendy's House in the Never-Never Land for Lost Boys. Here dwelt a Scottish settler, his wife and family, and with them the grandparents and their family. Times had gone hard with the pioneers from the Land of the Heather. Crops had failed, and the cold of Canada seemed intense, even to their brave Scottish blood.

Food was none too plentiful, clothing was scanty and bedding bare. The young wife, already a mother of several bonny looking bairns, was expecting to present to the land of her adoption the greatest gift of all a new Canadian.

Prospects looked bad to this Scottish family, friends were far away over the seas and the hills of their native land. To whom could they turn in their time of trouble?

Neighbors were few and far between, kindly and considerate as all Westerners are. In one German home there was a Radio, a new toy that was proving not a plaything but an ever present friend. It gave the latest news of the day to the people of the far northland. Music was theirs, and song and speech. Then one day there came a new feature, a voice telling of the great Red Cross and what it was doing to build a better and healthier Canada.

Suddenly the blue-eyed German smiled. "Mitgating suffering," said the voice, "wherever found." Other phrases came clearly over. "Helping the Sufferer, cheering the new comer, sending relief, caring for Mothers and Babies." Then the smile grew wider, for here at their own doors was just such a case as the Red Cross was able to succor.

The Golden Rule was put in action at once and through the neighborhood of a German friend a fine new Scottish-Canadian was born under the Red Cross flag.

Golf Week At Jasper Park

Events At Jasper Park Lodge Golf Course, Jasper, Alta., September 10th to 15th (Mornings)

Saturday, Sept. 8th (Morning)—Handicap match against par, eighteen holes. Players allowed three strokes for medical handicap. Entries may arrange their pairs. (Afternoon)—Ladies' handicap—Match against par.

Wednesday, Sept. 12th (Morning)—Jasper Totem Pole Trophy. First round, eighteen holes; all flights. (Afternoon)—Ladies' first round; all flights.

Thursday, Sept. 13th (Morning)—Jasper Totem Pole Trophy. Second round, eighteen holes; all flights. (Afternoon)—Mixed foursomes. Medal round.

Friday, Sept. 14th (Morning)—Jasper Totem Pole Trophy. Final; all flights. Men and ladies. (Afternoon)—Mixed foursomes. Match against C.D.G.U. par 3 of combined handicaps.

Saturday, Sept. 15th (Morning)—Jasper Totem Pole Trophy. Final; all flights. (Afternoon)—Ladies' putting competition. 5 p.m.—Prize giving.

The winner of the first 16 in the Totem Pole Trophy competition will receive a reduced facsimile of the trophy, which will be his permanent possession. The trophy itself, upon the giving of bond, may be held for a year by the club from which the winner enters.

Send Beavers To Scotland

Canada has donated a pair of live beavers to the Zoological Society of Scotland. These little animals, captured and conditioned in Jasper National Park, were transported to Montreal and placed aboard the S.S. Cairnair. Their destination is the Zoological Gardens at Edinburgh.

Wise and experienced mothers know when their children are troubled with worms and lose no time in applying Miller's Worm Powders, a most effective vermifuge. It is absolute in clearing the system of worms and restoring those healthy conditions without which there can be no comfort for the child, or hope of robust growth. It is a most trustworthy worm exterminator.

The number of persons employed in road construction in Canada in 1925 reached a total of 26,071, and was greater than in any of the past seven years.

For Rheumatism use Minard's Liniment.

Care For Your Hair With Cuticura Soap

And Cuticura Ointment. Before shampooing anoint the scalp with Cuticura Ointment, letting it remain on over night when possible. Then shampoo with a suds of Cuticura Soap and warm water. Rinse thoroughly. A clean, healthy scalp means good hair.

Sample Box Free. Write: Address Canadian Drug Company, Ltd., Montreal, P.Q. Send six-cent stamp for Cuticura Shaving Stick 25c.

Seventh British Dominion

Palestine In Line For This Position
Says Jewish Leader

That Palestine would eventually become a seventh British Dominion was the prediction made by Dr. Schmayer Levin, Jewish leader, who opened the United Palestine Appeal for Western Canada recently.

"Great Britain is in Palestine to stay," declared Dr. Levin. "Her mandate will only be withdrawn when the Jewish nation shall have established itself as one of the commonwealths of British nations. Great Britain needs Palestine as the key stone country in the Near East and as a guardian state of the Suez Canal. In fact, she needs the Jews fully as much as they need her," he asserted.

Dr. Levin reported that the crisis which Palestine had recently undergone was almost over. Jewish settlers were making a striking success in agriculture. Oranges produced on Jewish farms were obtaining 20 per cent. higher prices than those from other countries.

Wretched From Asthma. Strength of body and vigor of mind are inevitably impaired by the visitations of asthma. Who can live under the cloud of recurring attacks and keep body and mind at their full efficiency? Dr. J. D. Kellogg's Asthma Remedy dispels the cloud by removing the cause. It does relieve. It does restore the sufferer to normal bodily trim and mental happiness.

A Land Of Farm Owners

Western Canada is a land of farm owners, according to census revelations. In Manitoba more than 81 per cent. of occupied farms are inhabited by their owners; in Saskatchewan over 77 per cent. and in Alberta over 75 per cent.

Nail GYPROC right over Old Walls

GYPROC Advantages for Farm Buildings

Easy to use.
Low cost.
Workable as lumber.
Cannot warp, bulge, crack, shrink or burn.
Takes any decoration.
Resists heat and cold.
Vermin proof.
Eliminates repairs.
Ideal for lining garages, poultry houses, barns, grain bins, and other farm buildings.
Especially suitable for converting attics and basements into extra rooms.

How many rooms in your home have walls that are cracked and faded? Make them "good as new" by nailing Gyproc right over the old, unsightly wallpaper. When you've decorated with Alabaster you'll have a home that is as attractive and comfortable as any home can be.

Use Gyproc for partitioning off extra rooms, renovating attics and basements, and making grain bins, stables and other farm buildings fire-safe and vermin-proof. You can put it up yourself—easily, quickly and at a substantial saving.

Gyproc Joint Filler applied at all the joints insures a perfectly smooth, flat surface that will take any decoration.

Tourist Traffic Helps People Of United States To Become Better Acquainted With Canada

Figures recently issued by the United States Department of Commerce indicate that last year more than 1,000,000 Americans spent over \$100,000,000 in Canada. This is a record for the United States for every head of the Dominion's population against \$17.75 spent in Canada for each person in the United States.

However that is aside from the point that Canada officially welcomes the tourists and desires that each and every one should have a most pleasant and enjoyable holiday with them in the Dominion's borders, and that they shall go home with pleasant recollections. In this latter connection the Natural Resources Service at the end of the tourist season last year reported that its correspondence showed that the visitors were for the most part satisfied and pleased with Canadian hospitality. Allowances were willingly made for roads under repair and Canadian courtesy was fully recognized; what complaints there were related to lack of suitable accommodation except in the larger centres, and to overcharging. The Service issued a warning "Don't Overcharge the Tourists," in which it was stated that there were some very definite accusations of unfair treatment. This warning received very wide publicity, and it is not expected that there will be complaints this year. Nevertheless before the season is far advanced it is believed to be in the public interest to repeat the warning and no doubt the boards of trade, municipal officials, automobile associations and the merchants will be on the look out for offenders.

A pleasing feature of this year's correspondence is, that a great many more people in the United States are better acquainted with Canadian geography. In place of writing "Please tell us about Canada," they now want to know about the roads connecting certain cities, the location and the sporting and recreational attractions. Many are interested in points of historical interest.

A great many persons who visited Canada last year will come again this season and this is highly significant of the interest in our country when they plan to afford the time for another visit in the immediately succeeding season. The following is from a letter written by a woman in Maryland, who motored in Canada last year, and asks for help in planning a trip this year.

"I had heard so much about Canada before last year, but I'd always thought of it as some far away place, and having people different from us in the States. I don't know when I've ever felt more at home than I did while in Canada, and your people are some of the finest on earth. I'm sure, so hospitable, and even the police you have are courteous and willing to assist visitors, and even bearing with them in their traffic errors. Maybe you don't receive many letters like this but I'm sure that some folks with whom I've talked about Canada have the same opinion that I have."

Canadians who have helped to entertain and assist our American visitors in their journeying through Canada will appreciate that kindly expression of appreciation and there are very many more like it. Canada welcomes the tourists and does want to see them come again.

Extent Of Tar Sand Deposits
The deposit of bituminous sands, commonly known as tar sands, on the Athabasca River and its tributaries in northern Alberta, covers an area of approximately five thousand square miles of varying depth, density, and richness.

"Do you still go about with Elly?"
"She is married now."
"That is not an answer."—Die Muskete, Vienna.

W. N. U. 1739

Saskatchewan Is the Healthiest Province

Has Lowest Annual Death Rate According To Statistics

Saskatchewan is the healthiest province in the Dominion, if the death rate is any criterion, says a dispatch from Ottawa. Returns issued by the bureau of statistics give Saskatchewan an annual death rate per thousand population of 6.9, the rate being based on deaths last December.

Quebec has the highest death rate with 12.8; New Brunswick comes a close second with 12.7.

The rate for Western provinces, with comparisons for 1929, is given:

Province	1927	1929
Manitoba	7.6	7.8
Saskatchewan	6.9	6.9
Alberta	8.1	8.3
British Columbia	10.1	12.6
Dominion	10.7	11.3

Infantile mortality continues to take its toll, although the figures are improving. Returns for last December give an infantile mortality rate for the Dominion of 85 per thousand, living births against 100 per thousand in the December previous.

Quebec, among the provinces, had the highest infantile mortality rate for last December, namely 112.4 per thousand; Ontario the lowest with 65.6. Alberta showed the biggest relative improvement. In December, 1928, the Alberta rate was 113.2; last December it was 68.8.

A Smart One-Piece Dress

A style that proves a favorite for the woman who desires to look slender. The collarless V-shaped neckline is completed with a vestee crossing in diagonal line. The side tunics are simply stitched to the lower part of front along perforations. Tucks at shoulders are made on the wrong side for decorative effect, and the set-in sleeves are dart-fitted. No. 920 is in sizes 16 years, 36, 38, 40, 42, 44 and 46 inches bust. Size 36 requires 3 1/2 yards 36-inch, or 2 1/2 yards 54-inch material, and 1/2 yard 27-inch contrasting. Price 35 cents the pattern.

Home sewing brings nice clothes within the reach of all, and to follow the mode is delightful when it can be done so easily and economically by following the styles pictured in our new Fashion Book. A chart accompanying each pattern shows the material as it appears when cut out. Every detail is explained so that the inexperienced sewer can make without difficulty an attractive dress. Price of the book 10 cents the copy.

ELEVATED TO THE PEERAGE

Sir Alfred Mond, who was elevated to the peerage in the king's birthday honors list. As he was a Conservative M.P. in the British House a by-election must be held in his riding. Among his many interests he holds the presidency of the Mond Nickel Co. in Canada. He also heads a new concern in the maritimes announced last week.

Moscow Has Glass Houses

New Type Of Architecture Becoming Popular In Russia

If new school of Russian architects has its way, the Soviet Union in time will be a place where people literally live in glass houses. Already they work and do business in a number of new buildings in which glass is the predominant material, with a mere framework of steel and concrete to hold the transparent walls together.

Set among the shabby ornate houses of old Moscow, these structures in the transparent area is larger than the opaque. One wonders how these houses, which are all window and no wall, would fare in the event of excitement, such as the cities knew in 1917. A few well-aimed bricks would leave them in ruins.

The new houses are simplified to the point where they seem built with a child's toy blocks, with wide ribbons of glass all round. Straight lines everywhere, and the few curves are full circles, without any of the decorations and ellipses of the older structures. They seem to be the other extreme, perhaps deliberately so—of the clustered church architecture with their spirals and onion-shaped domes characteristic of old Russia.

A clergyman who had given up his former position as a magistrate in order to enter the church, was conducting his first marriage service.

"Will thou have this man to be thy wedded husband?" he asked the bride.

The bride answered eagerly: "I will."

"And you," he continued, addressing the bridegroom, "wilt have this woman to be thy wedded wife?"

"Yes, I will," he answered.

"And you," he continued, addressing the bridegroom, "wilt have this woman to be thy wedded wife?"

"Yes, I will," he answered.

"And you," he continued, addressing the bridegroom, "wilt have this woman to be thy wedded wife?"

"Yes, I will," he answered.

"And you," he continued, addressing the bridegroom, "wilt have this woman to be thy wedded wife?"

"Yes, I will," he answered.

"And you," he continued, addressing the bridegroom, "wilt have this woman to be thy wedded wife?"

"Yes, I will," he answered.

"And you," he continued, addressing the bridegroom, "wilt have this woman to be thy wedded wife?"

"Yes, I will," he answered.

"And you," he continued, addressing the bridegroom, "wilt have this woman to be thy wedded wife?"

"Yes, I will," he answered.

"And you," he continued, addressing the bridegroom, "wilt have this woman to be thy wedded wife?"

"Yes, I will," he answered.

"And you," he continued, addressing the bridegroom, "wilt have this woman to be thy wedded wife?"

"Yes, I will," he answered.

"And you," he continued, addressing the bridegroom, "wilt have this woman to be thy wedded wife?"

"Yes, I will," he answered.

"And you," he continued, addressing the bridegroom, "wilt have this woman to be thy wedded wife?"

"Yes, I will," he answered.

"And you," he continued, addressing the bridegroom, "wilt have this woman to be thy wedded wife?"

Lived On Strange Food

Rare Snail In British Museum Evidently Ate Glue

The entire force of the British Museum knocked off work recently and devoted itself to searching for one of the rarest snails in its collection, which disappeared suddenly and inexplicably after having remained sedately glued to a piece of cardboard for twenty years.

After a frantic search, the gastropod was discovered admiring the exhibits in a far distant wing of the museum. The assembled savants put their brains together on the problem, and decided that the snail, whose blankness and sedentary existence of two decades, M. Escargot had lived on the glue which held his apparently inert carcass to the cardboard on which he was mounted. The glue finished, there was nothing to keep him at home, either from an alimentary or adhesive point of view, so he went. The wandering mollusc has been returned to his position, where he is secured this time by enough glue to keep him in food for at least another century.

How Ploughing Has Improved

Method Of Two Hundred Years Ago Was Very Crude

The moldboard plough of 200 years ago required three men and four to six oxen to turn a narrow furrow in tough prairie soil, so great was the friction of the rough wooden moldboard. This type of plough was the most advanced model of the times and an improvement over the common crooked stick with an iron point tied on with rawhide.

In those days, three men ploughed from one to two acres per day with a tremendous amount of physical labor. Today, one man sits on a comfortable tractor seat and ploughs 19 acres easily with a three-bottom plough in the same number of hours and 17 or 18 acres with a modern five-bottom plough.

The man who in 1923 operates a three-bottom plough with a tractor or big-team hitch accomplishes 25 or 30 times as much as his ancestor did in Colonial days with his oxen and wooden plough, while the jagged, crooked furrow of pioneer times was made indeed compared with the smooth turned earth from the shiny surface of a modern moldboard.

Employ Bituminous Sands

By means of actual tests in road construction it has been definitely established that the bituminous sands of northern Alberta can be successfully employed for paving purposes. As the present supply of these sands is practically unlimited, their presence and use appear to have solved the problem of permanent paving and road construction in the western provinces.

Increased Employment

The Dominion Bureau of Statistics tabulated reports from 6,504 firms who reported a decidedly upward movement in employment on May 1st, the payrolls being increased by 36,070 persons to 83,047. The index number showed a gain of over four points at 105.5 compared with 101.1 on April 1st, and 100.6 on April 1st of last year.

People with fair hair and blue eyes are not so well equipped to face brilliant sunshine or other light as those with dark hair and eyes.

NEW SETTLERS FOR SASKATCHEWAN

The enthusiasm of European settlers who have found comfortable and profitable conditions in Canada, has proved one of the best colonizing features of the Dominion. A recent example is that of Dr. Von Seeberg, noted German, who came to Canada several years ago and took up land near St. Walburg, Sask. His experience was such that on his return from a recent visit to Germany, he brought back with him twenty-seven sturdy German agriculturists of long experience. All of these were placed on land near St. Walburg by F. J. Freer, Superintendent of Land Settlement for the Canadian National Railways. The photograph shows Dr. Von Seeberg (holding boy's hand) and some of his party on their arrival in Winnipeg.

National Museum Of Canada Planning Extensive Research Throughout West This Season

USE RADIO FOR PROSPECTING

Radiore System Now Used In Canada Is Not New

Radio has gone prospecting and the past has demonstrated that where radio goes the old order vanishes. Up in Canada's nickel country, north of Sudbury, Ontario, one may hear the cry "Line!" From out the distance comes the answer "O.K." There is silence for a minute or so. Then come two shrill blasts on a whistle and the answer "O.K." It is not a traffic cop on vacation practicing his calls as he yearns for his busy corner. It is not some strange animal unknown to zoologists. It is not the wind whistling around the base of some steep cliff. It is the scientific prospector plying his vocation.

The equipment consists of a transmitter, a big tripod loop with levelers for working on uneven surfaces, and a receiver. It is operated by a crew of four men. The transmitter is set up on the property and the receiver is taken from place to place. It is pointed at loop and the signals received are checked to zero. The shout "line" is to tell the operator at the receiver where to focus on the loop. The "O.K." and two whistles are a check report. When these are received the transmitter is turned on. It works on a wave of about 3,000 meters. The signal is picked up through electrical conductors underground. These are sulphide-bearing ore deposits, which radiate the signal to the receiver.

The angle of the signal is obtained and the receiver is moved to another angle. These angles constantly grow smaller and smaller to zero. When this point is reached the receiver operator checks his location by converging on it from the opposite direction. If zero is again proved, the location is over a sulphide-bearing deposit. The depth of this is ascertained by signal intensity. Should a number of zero spots be located at different places on the same property and no angles are shown on the transit, it is due to the fact that there is no electrical conductor underground to radiate the signal.

This method of prospecting is called the radiore system. It has been used with success in Arizona, and throughout the Southwest for several years. Canada adopted it last summer and it has been employed extensively and successfully in the Itouyn district of Quebec. The apparatus does not give the nature of the ore body located and whether or not it is of commercial value must be proved by drilling.

Should Be Preserved

Prehistoric Indian Photographs In B.C. Are Valuable Relics

Prehistoric Indian photographs, painted in red on Six-Mile Bluff, near Seamus, on the main line of the Canadian Pacific Railway, have been photographed by Harlan A. Smith, archeologist of the National Museum of Canada at Ottawa. Some appear to represent men, one a canoe, with upright lines probably representing other men, and others are difficult of interpretation.

These strange pictures are easily seen from the west side of Lake Mara and at present are undamaged. It is urged by Mr. Smith that they should be placed under the B.C. Provincial Act that protects such antiquities from vandalism.

It takes an expert to convince others that he is less ignorant than he really is.

Unless a man possesses self-control he is little better than a slave.

The saxophone was invented by Adolph Sax, a Belgian.

"You broke the window, but because you have told the truth I shall not throw you out, your father will have to pay for the window."
"Then I am sure to be thrashed!"
Megendorfer Blaetter, Munich.

The National Museum of Canada will, according to an announcement made by Dr. W. H. Collins, Acting Director, have several parties engaged in field work in Western Canada during the season of 1928. Collections will be made for exhibition and for study, and scientific investigations will be carried on that cannot be conducted except in the field.

H. I. Smith, who has been investigating the ancient village site, shell heaps and rock carvings of the Indians on the coast of British Columbia, will continue this work around Prince Rupert during the summer. During part of the season he will take motion pictures illustrating the manners and customs of some Indian tribes not represented in the four reels which he has already prepared for the National Museum, and which have proved so popular both in Canada and Europe.

J. C. Boileau, Grant, Professor of Anatomy in University of Manitoba, is undertaking for the National Museum a thorough examination of the Indians at Fond du Lac, at the east end of Lake Athabasca. Besides making a complete series of physical measurements of both adults and children, he will carry out some blood tests, with the co-operation of the Department of Health, to investigate the theory that the Indians separated from the rest of the human race before the human blood underwent the two mutations that seem to have occurred in the Old World.

C. B. Osgood will spend a year on the lower Mackenzie river, in the vicinity of Fort Norman, studying the social and economic life, the religion and the traditions of the little known Hare and Mountain Indians who trade at the post. He will probably winter in the woods with the Indians, and return south in the summer of 1929.

Hugh M. Raup will make a botanical survey of parts of Wood Buffalo Park, south of Great Slave Lake. With the co-operation of the Northwest Territories and Yukon Branch, Department of the Interior, he will investigate the forage plants and range conditions, in certain areas in the park.

Hamilton M. Laing will continue collecting mammals in southern British Columbia in the region near the International boundary line, beginning at Princeton, just east of the Cascade mountains divide, in continuation of the work carried on by him and C. H. Young, in 1927, just west of this point. A number of species reach their northern limit of distribution near this line, and the field work of 1927 brought in several specimens of the Oregon mole, not heretofore recorded from Canada, and several other species which are of great rarity in this country.

This region is of particular biological interest because of the extraordinary and sharply defined variety of climatic and topographic conditions that occur from east to west, and because it differs also in these respects from the country to the north, and these differences are reflected in the fauna and flora. Birds and animals will also be collected.

C. H. Young will collect biological specimens in southern Manitoba, beginning at Trelebank, and working east near the international boundary line to Lake of the Woods. He will pay particular attention to the spread of certain species, as the Mississippi Valley pocket gopher, the Nebraska cottontail rabbit, and other forms which have been reported as extending their range into Canada from the states of North Dakota and Minnesota. He will endeavor to obtain material for habitat groups of insects for exhibition in the museum.

C. M. Sternberg will collect fossil remains of dinosaurs and other extinct vertebrate animals from near Steveston, in the valley of Red Deer River, Alberta, and also from the Cypress hills, in the south-eastern part of Alberta. The Red Deer valley is exceedingly rich in vertebrate material, which is being slowly exposed by erosion of the sides of the valley. It is the most productive collecting field in Canada and has already yielded much new and well-preserved material to the museums of Ottawa, Toronto, Edmonton and New York.

Inspecting Dairy Herds
Dr. J. B. Still, chief Dominion Veterinarian for Manitoba, has received notice to have inspected 210 farms and herds between Winnipeg and boundary, whose owners desire to be able to ship milk into the United States under the new regulations.

There are Two Sides to this Story

MOST people think of their Chevrolet dealer as a NEW-CAR dealer . . . partly because of the large number of new Chevrolets which they see on the streets. But, while new car sales are the Chevrolet dealer's biggest reason for being in business, they form only one side of his activities. He must not only sell cars but he must also exchange them.

Every good, successful Chevrolet dealer must also be a good, successful Used Car dealer.

From his experience in selling Chevrolet cars, he knows motor-car values . . . He knows that it is just as important for him to sell a Used Car as a new car . . . He knows that Used Car buyers have a right to as much for their dollar and are entitled to as complete satisfaction as new car buyers . . . He knows that satisfied Used Car owners will eventually become prospects for new cars . . . He knows the value of good-will.

In short, our business as Chevrolet dealers depends on our reputation as used car dealers. That is why you are sure of a square deal and a sound dollar-for-dollar value, when you buy a used car here. UC-7-7-28C

The Wastebasket

"Look at that now," said a proud, young father here last week as he held up his first born, "don't you think he looks just like me?" "Yes," replied the neighbor, "but I wouldn't worry about that as long as he's healthy."

"Good evening, my young friend, are you attending a place of worship?" asked a minister at farrow when he met a young fellow there on the street last Sunday evening. "Yes, indeed sir," the young man replied, "I am on my way to see her now."

"That Forsythe fellow said your dancing reminded him of the post office," said one local girl to another at the dance here. "What do you suppose he meant by that?" "You stamp all over," the other replied.

"Your doctor is out here with a flat tire," said a local garage mechanic to his boss, Tuesday. "Diagnose the case as flatulence of the perimeter and charge him accordingly," the proprietor replied.

"Why did Eve eat the apple?" asked a Sunday school teacher of a class at Kinsella last Sunday. "Because the Lord told her not to," replied a bright pupil.

It is reported that four well known ladies here engaged in a hand to hand contest one day last week. They were playing cards.

Do you remember the time you had to do a lot of studying and worrying to understand the railroad timetable?

"Who is that peach you brought with you to the dance tonight?" asked one Bruce fellow of another at the dance. "That's no peach," the other replied, "She's a grapefruit. I squeezed her and she hit me in the eye."

"Doctor, my wife has insomnia very bad," said a citizen to a local physician, "she often remains awake until two o'clock in the morning. What can I do for her?" "Go home earlier," advised the doctor.

"I see a lot of the local girls have postoffice eyes," remarked a stranger to a native here last week. "Postoffice eyes?" queried the native, "What kind of eyes are those?" "One look and the male is lost," replied the stranger.

JULY ROD & GUN AND CANADIAN SILVER FOX NEWS

A pleasantly varied bill of fare dealing with some more unusual phases of life in Canada's outdoors features the July issue of "Rod & Gun and Canadian Silver Fox News" which has just been published. While Ozark Ripley contributes one of his splendid fishing stories, Bonnycastle Dale, in view of a recent discussion, this month deals with natural phenomena in Canada which have been mistaken for the fabled sea serpents.

Robert James continues his interesting series of "Tales from the Wardroom Mess," with sketches of life in the north and the Swampy Cree. Other articles deal with many subjects from "song birds to wild cats and jack rabbits and fish, dogs and gams." "The Canadian Silver Fox News" section, capably edited by J. R. Barr, contains a usual quantity of interesting and instructive articles relative to the industry.

"Rod & Gun and Canadian Silver Fox News" is published monthly by W. J. Taylor, Limited, Woodstock, Ontario.

SUMMER DIARRHOEA

Every year there occurs an appalling number of deaths from diarrhoeas. In Canada, in the year 1926, there occurred 4314 deaths of infants under one year of age as a result of this condition.

The best and surest protection against such a condition is breast-feeding. Wherever such deaths are investigated, it is found that most of the cases occur amongst infants who are artificially fed. There are many other good reasons why infants should be fed on the natural food, but the one reason that it protects against diarrhoeas is sufficient to make every mother realize her duty in this matter.

The baby who is so unfortunate as to be deprived of his natural food must receive every care. He should be under the regular supervision of the family physician. He should be fed according to the physician's instructions and no change should be made in his feedings unless they are ordered by the physician.

The baby must be dressed according to temperature, not the time of the year, in order to protect him from sudden changes of temperature against which he must be safeguarded.

Diarrhoea in a young child is a very serious condition. When it occurs, the family physician should be called at once. Thinking that the diarrhoea was caused by teething or some other condition has been responsible for delays in securing prompt treatment. Such delays may cost the baby his life.

BETHANY HOME FOR THE AGED, BAWLF, ALBERTA, CAN.

From the report for 1927 submitted to the general convention of the Norwegian Lutheran Church of America by its Board of Charities, it appears that the Bethany Home for the aged had cared for 22 old people during the year, that there were 6 new persons admitted during the year, and that there have been no deaths. Of the 22 inmates, 1 was admitted free. Only 4 were sick during the year.

There were 420 old people in the 9 Sunset Homes of the church. 860 children were taken care of in the 7 children's homes and the 1 receiving home. During the year, 245 aged and 210 children were given the necessary care in the 3 rescue homes. 498 children were placed by the Home Finding Department and 255 children were cared for by the 2 day nurseries. Among the 860 children in the children's homes, there was 1 death, and among the more than 2000 children cared for by the entire Child Welfare Department, there were 6 deaths, which is remarkable considering the condition in which many of them by the Department.

The 27 city missionaries, in 21 cities from New York to Los Angeles, attended 27,492 persons in 304 institutions, made 5,923 visits in homes, assisted 616 families with food, clothing, etc., and distributed 52,394 tracts, booklets, Bibles and portions of Scripture.

"These modern girls are certainly a puzzle," declared a local fellow on the street yesterday, "if you are true to her she thinks you are a fool and if you are untrue your friendship is not to be cultivated. If you trust her with other men you don't love her, and if you don't trust her you are jealous and not to be tolerated. If you are good to her you have an axe to grind, and if you neglect her she hates you. So what is the dickens can a fellow do?"

WIN FROM INNISFAIL

The Viking Elks ball team defeated the Innisfail ball team at Wetaskiwin Tuesday afternoon by the score of 15 to 0, which you will allow is some score. They are scheduled to play the finals this Wednesday afternoon, but it looks dubious because as this is written rain is falling all over this district, but we haven't heard whether it reaches Wetaskiwin or not.

The Bruce Sports and Stampede will be held Thursday, July 26th. There will be special platform attractions along with a full line of Stampede events this year. The Vegreville Band will be present.

Vegreville is holding a baseball tournament on Wednesday, July 11th, in which four teams will compete. The Viking Elks team is entered. The first game is scheduled to start at 12:30.

The Cole & Rogers circus held forth here last Wednesday afternoon and evening and drew a large attendance. Some of the animal acts were fairly good, the trapeze performers in one or two cases doing some real performing, the band doing well with only ten members. The clowns were a disappointment. The general admission was a dollar which was a good price for the show, but after you got into the main tent, some slick ticket salesmen just about made you believe that you had to buy another ticket for a seat, whether reserved or not. We doubt whether their tactics in this respect will gain the show any friends for a return engagement here or anywhere else.

The natural grove in front of the hospital has been cut down and the grounds plowed and disced. A new sidewalk has been laid from the front gate to the hospital. Considerable improvements to the grounds are under consideration.

Viking

Sunny skies greeted Viking district's annual celebration of Dominion Day last Monday, held under the auspices of the Viking & Birch Lake District Agricultural Society. From Saturday until Monday morning the skies were overhanging with threatening clouds but Monday morning found Old Sol doing his bit to make the celebration and sports a success. And to say that the day was a success from every standpoint is the opinion of all in attendance. In spite of celebrations being held at every other important town north, south, east and west, the local sports were well attended, even from other neighboring towns, and the crowd was as big as generally turns out to Viking's big annual day which is and always will be held on Dominion Day.

The day began with concert on the Main square by Elks band after which they led the crowd to the fair grounds which from noon until sundown was a veritable hive of excitement and sports of every kind. It would be difficult to give a detailed report of every contest, but it is sufficient to say that all games were eagerly watched by the crowds. The final ball game between the senior teams from Camrose and Viking was a thriller in the last stages of the game. With Viking having a comfortable lead of five runs in the seventh inning, most everyone was just waiting for the end with Viking away in the lead. But Camrose took a sudden lease of life in the lucky old seventh and ran in five scores on errors and hits, enough to tie the score 7 to 7. From then on until the last half of the seventh inning the teams battled grimly for the run that would spell victory and a big cut in the prize money melon. With one out, Max Grey came to bat and sent a sizzler of a grounder to first which was missed by the Camrose first baseman, Max advanced to second on an overthrow and came home with the winning run when the ball thrown from second was wide of the plate. There was some dispute in regard to the ball being a foul, but the umpire called it a fair ball and stuck to it in spite of protests from the visitors. If the first baseman had fielded the ball, chances are there would have been no dispute about it—but that's baseball. In the seventh when Gray tried to field a high fly ball in centre field, he was blinded by the sun and the ball struck him in the mouth, knocking him out for a few seconds. He gamely continued however after being revived and was responsible for making the winning run.

The Killam Junior and Intermediate ball teams defeated the local teams in two well played games that drew a lot of interest.

The Football teams from Viking, Phillips and Rutherglen put on a tournament which was won by Phillips. Phillips first eliminated Viking 2 to 0; and then took on Rutherglen in the finals and held them scoreless, Phillips 4, Rutherglen 0. Art Day refereed the first game, and Jas Bainbridge, the finals.

At basketball, Phillips girls team won from the Holden aggregation by the margin of one point.

The Viking men's basketball team won out from Rseogardland and Phillips in a tournament, first defeating Rosegarland 20 to 11, then defeating Phillips 19 to 10. Lane McAtthey, A. Lefsrud and Anthony Lefsrud acted in the capacity of referee for these games.

The horse races were watched by a large crowd that lined the track at the finish post. In the free for all harness race, Jas. Loughlin took 1st, B. Knoll, of Killam, 2nd and 3rd. Free for all run, J. Jorgenson 1st, R. Lynde 2nd. In the pony race J. Jackson took 1st, and M. Burgess 2nd. The races were well run off and this sport is gaining the popularity with the crowds that it deserves. Chas. Broughton drove the Loughlin horse and did a pretty fair job of it.

The music by the Elks band was greatly appreciated by the crowd and the boys are to be commended for adding a great deal to the enjoyment of the day's sports.

The Elks were going strong in the midway all afternoon and from reports heard today, some of the boys were right there with the balmy stuff. The Elks also gave each kid on the grounds a treat.

The booths were well handled under the direction of Noble Graham who had a capable staff on the job.

The town was in gala holiday attire, mostly all residences and business places being decorated with flags and bunting. No trees were available this year on account of the caterpillars having eaten off all the foliage.

Movies were run off from 7 to 9 p.m., after which the Viking orchestra played for a dance which was held in Recreation hall and was attended by a large crowd from far and near.

It was a good sports day in every respect.

Big Features found in no other Low-Priced Six

AMONG the scores of advanced engineering features that contribute to the impressive quality of the New Series Pontiac Six, there are three advancements worthy of special notice . . . three important features found in no other six at Pontiac price.

First, the New Series Pontiac Six offers the smart styling, the luxurious comfort, the rich appointments and the staunch construction of bodies by Fisher.

Second, the New Series Pontiac Six engine embodies the new G.M.R. (General Motors Research) cylinder head, which uses ordinary gasoline to achieve amazing smoothness and silence with economy of operation.

Third, Lovejoy Hydraulic Shock Absorbers, standard equipment on the New Series Pontiac Six, provide an ease of riding that makes the roughest roads seem smooth.

Here are three big features that no buyer of a six in Pontiac's price class can afford to overlook. Even if the New Series Pontiac Six offered no other exclusive advantages, it would still hold its position as the world's finest low-priced six.

Ask your dealer about the G.M.A.C. Deferred Payment Plan which makes buying easy. 723-6-186

By an order-in-council the Saskatchewan Gasoline Act, 1928, has been amended to exempt all railway companies operating in Saskatchewan from payment of the tax.

Last year 63,000 British subjects from the United Kingdom were helped by the Government to settle overseas, states the "Oversea Settler."

Negotiations for trade treaties with several foreign countries, including Newfoundland, will be entered up by the Canadian Government during the present year.

Dr. Otto Hamman, long a figure in German political life and chief of the press bureau of the foreign office from 1894 to 1915, is dead at the age of 76.

The equal franchise bill, giving women the vote at the age of 21 under the same terms as men, passed its third reading in this House of Lords without discussion.

More heels, more parsnips, more oats, more fax and more wheat are produced annually at the Saskatchewan prison in Prince Albert than in any other penitentiary in Canada.

At Philadelphia the seaplane PN-12, carrying a useful load of 2,000 kilograms (approximately 4,400 pounds) broke the world's altitude record by ascending more than 12,000 feet.

A new five-cent air mail postage rate, to be effective August first, is announced by Postmaster-General New, of the United States. A five-cent air mail stamp has been authorized.

Dr. Fridtjof Nansen, famous Arctic explorer, told the International Congress of Aerial Arctic exploration that in 1929 he intends to make an extended polar flight in a dirigible airship. He said this ship was now being constructed in Germany.

Put Trout in Mountain Lake

Experiment in Fish Culture Is Done Successfully in Jasper Park

After a journey of at least two thousand miles the largest group of United States immigrants that ever settled in Canada has established its home in Jasper National Park.

During the week-end 200,000 Brook trout fingerlings, all the way from Creco, Pennsylvania, were placed in the water of Maligne Lake. They came to Canada last winter as eggs and for months they have been carefully nursed in a hatchery especially constructed for them.

Herbert Davis, one of the pack wardens whom grow from eggs to fish, kept the cold water running at the proper temperature, and when they were big enough to eat fed them chopped liver. They were brought from Pennsylvania to Jasper by Canadian National Express, and were transferred to Maligne Lake by pack horse, wagon and automobile.

There was no difficulty in these last 35 miles to keep the tins in which they floated constantly moving, and they made the journey without mishap. The water of the lake was tested before they were lowered into it, and they showed themselves acclimated immediately. Oliver Bright of Qu'Appelle, superintendent operations and Warden Davis kept watch over his pets until he saw them safe in their new home. The stocking of Maligne Lake with trout is one of the experiments being made in glacial waters by the Dominion Government.

Reason For Expansion

With Canadian eating on the average, 80 pounds of pork per capita per year, 75 pounds of beef, but only 10 pounds of lamb and mutton, there would seem every reason for expansion in the last named meat, according to a statement issued by the Canadian Co-operative Wool Growers' Association.

"I saw the butcher kiss you this morning. I will fetch the meat in future."

"It's no use, madam. He only likes brunettes."—Ruy Blas, Paris.

W. N. U. 1739

Speeding Up Mail Service

Letters From British Isles, Delivered From One To Four Days Earlier

Letter mail from the British Isles and Europe will be brought from one to four days quicker to Canada through the Canadian Air Mail Service, recently inaugurated. The Canadian Post Office Department, following successful experiments made last year, has entered into contracts for the conveyance of mail by air, to and from trans-Atlantic steamers. Incoming steamers are met at Rimouski on the River St. Lawrence and letter mail is taken off and despatched by airplane to Montreal, Ottawa and Toronto. Mails for western points are carried in the plane to Toronto and from there sent on by train.

The advance in delivery is from twenty-four to seventy-two hours, depending on the time of arrival of the steamer, train connections, etc.

On outgoing steamers a supplementary despatch is given to business correspondence by direct air service from Toronto, Ottawa, Montreal to Rimouski, where this mail is placed on a steamer sailing from Montreal or Quebec several hours previously. In this way a supplementary despatch is given to letters which would otherwise have had to wait the next outgoing steamer sailing perhaps three or four days later.

Although the Air Mail Service as at present operating is primarily intended to speed up the transmission of European mail, advantage is taken of the existing service to carry specially marked inter-city mail between Ottawa, Montreal and Toronto. No extra postage is charged on letters carried by the air mail.

Winnipeg Newspaper Union

An unusual apron, cleverly designed, that appears more like a pretty morning frock, is found in pattern No. 345. It has a comfortable fitting waist, which is cut in one with front panel. The side sections are gathered and a dainty sash ties at the back. Japanese pongee, silk, cotton crepe in floral design, zephyr prints or plain or figured saten will give unending service for general wear and will launder beautifully. Small, medium and large size. The medium size requires 2 1/2 yards 27-inch; 3 yards 32 or 35-inch; 2 1/2 yards 40-inch material with 1 1/2 yards 18-inch contrasting, and 2 1/2 yards binding. Price 25 cents the pattern.

Our Fashion Book, illustrating the newest and most practical styles will be of interest to every home dressmaker. Price of the book 10 cents the copy.

Red Cross Editorial Contest

Congratulations Are Extended To the Winners in Both Daily and Weekly Sections

Congratulations are now being widely offered all over Canada to those who have won prizes in the recent editorial contest inaugurated by the Canadian Red Cross Society in the daily and weekly press of the Dominion, to celebrate the centenary of Henri Dunant and the founding of Red Cross for the world.

Prizes have been awarded to Robert Henderson of the St. Thomas Times-Journal, St. Thomas, Ontario, for the best editorial published in any daily paper, while Miss Mary Stuart Clendenen, of the Farmers' Advocate, London, Ontario, took the leading place in the weekly paper section in English. The other bright and clever people who won honors and prizes were: Second for dailies, H. B. Christie, The Expressor, Brantford, Ontario. Third, Miss Kenneth M. Haig, Manitoba Free Press, Winnipeg, Manitoba. It is worthy of note that Miss Clendenen is the present president of the Canadian Women's Press Club, while Miss Henderson is a past president.

Prizes for the weekly papers in English: second, C. J. Allison, The Asquith Record, Asquith, Saskatchewan; third, C. W. Peterson, The Farm and Ranch Review, Calgary, Alberta.

For the French section, prizes were awarded respectively to Adolphe Sève, La Patrie, Montreal; P. J. M. Fédal, La Solle, Quebec; P. Q.; and to Charles Gauthier, Le Droit, Ottawa, Ontario.

The judges for the English section formed into an adjudicating committee headed by Dr. James W. Robertson, chairman of the Central Council of the Canadian Red Cross Society were: Dr. Lorne Pierce, Editor, The Expressor, Toronto; J. F. B. Livesey, general manager, Canadian Press, Toronto; J. M. Elson, Canadian Author's Association, Toronto; Professor G. M. Wrong, History Dept., University of Toronto.

For the French section the adjudicators were: Mr. Leon Lorrain, of the Commercial High Studies School, Montreal; Mr. Robert Choquette, professor of the University of Montreal, and Dr. Victor Morin, past president of the Canadian Authors' Association.

The contest was entered by sixty-one papers, but dozens more contributed efforts without actually entering the contest. Several million readers were thereby informed that it was Henri Dunant who actually originated the idea of Red Cross for the world, whereas, formerly, only a vague idea that Florence Nightingale had done so, existed in many people's minds. Florence Nightingale, however, was publicly acknowledged by Dunant in a speech in London in 1872, as having been his inspiration.

BRITISH TRADE AND FOREIGN COMPETITION

Sir Charles Sykes, former coalition Liberal member of the British House of Commons, is concerned over foreign competition and its effects on British trades. "Dreadful remedies are required," he said on arrival in Canada a few days ago on the White Star liner "Regina." "If Great Britain is to be restored to that position in the world which she formerly held.

Saskatchewan Anti-Tuberculosis League

Movement To Have Free Treatment Of All Patients At The Public Expense

The annual meeting of the Saskatchewan Anti-Tuberculosis League was held at the Sanatorium, Fort Qu'Appelle, on Thursday, June 14th. In addition to the routine business, Mr. A. B. Cook, the president and managing director, briefly outlined the work of the League to date, and stressed the imperative necessity of extending the activities of the League along preventive lines, such as the examination of known "Contact Cases." He pointed out that at present no funds were available for this work, and that it had been decided, this year to proceed with the sale of the Sanatorium, Christmas, 1929. As was done in the other provinces of the Dominion and in the United States, where funds for both curative and preventive work are largely raised by this means.

Mr. J. J. Lamb, Secretary of the Municipal Health Insurance Association, and Mr. J. G. Knox, of Tuxford, Reeve of the Rural Municipality of Marquis No. 10, were elected to the positions of Directors to serve for a period of three years.

Two resolutions passed at the last Annual Convention of the Saskatchewan Association of Rural Municipalities, dealing with free treatment and examination of school children, were read to the meeting and discussed.

In view of the fact that resolutions had also been passed by the United Farmers Saskatchewan Branch, and by the Independent Order of the Daughters of the Empire, endorsing the principle of free treatment, these resolutions were heartily endorsed by the meeting.

It was resolved that the Legislature be petitioned to amend the Sanatorium Act so that all classes of T.B. patients shall have, free treatment available at the public expense. And further that same be paid: (a) Partly by the Government; (b) Partly by all Urban and Rural Municipalities in the Province.

It was further suggested that the share of responsibility be apportioned as follows: The Government to undertake all capital expenditure required in furnishing the necessary sanatoria with their equipment, and also contribute toward the expense of care and treatment of \$1,000 per hospital day, and the balance of care and treatment cost to be paid semi-annually by all municipalities of the province on an equitable basis. Also that the Convention request the Provincial Government to enact Legislation making it compulsory that all children of school age be examined for the diagnosis of tuberculosis and that subsequent to the first examination, examinations be held under the direction of the Department of Public Health.

Farmers' Marketing Tour

Canadian National Railway's Tour To Great Britain and Denmark, 1928

(Continued)

The next morning saw us out even earlier. At 8:20 we were viewing the Snow Hill Police Station adjoining Smithfield Market, the finest police station in Great Britain, yet, notwithstanding its modernity, spaciousness and hygienic advantages and the interesting pictures of lovely ladies which we found in the policemen's recreation room, none of us really wished to stay.

From this last view in police stations we went to the smoke houses and provision establishment of Messrs. George Bowles, Nicholls & Co. Ltd., where we were shown sides of bacon from twelve countries, including Canada. Mr. George J. Nichols, Managing Director, compared the various qualities. Canadian bacon, he said, was placed fourth in public opinion, ahead of the Irish, next to the Danish, and then Canadian. Comparison was also made with butter, cheese and eggs. Two Chinese eggs, which were broken and shown to be perfectly "fresh" so far as digestibility was concerned. Both had large yolks and were examples of what a good deal was learned from the British market and whose remarks brought forth many questions from the party.

We were now taken in hand by the Central Markets Committee of the Corporation of the City of London, who showed us Smithfield Meat Market and Spitalfields Fruit and Vegetable Market including the extensions which are being made to the latter at a cost of \$1,000,000. We had scarcely time to reflect upon the history of this seven-hundred-year-old market-place, the largest meat market in the world, except to recall that Wat Tyler was slain by Sir William Walworth in the presence of King Richard II., and that it had been the scene of the burning of Protestant martyrs, for soon we were travelling through aisles of meat which never seemed to end. There were 5,000 tons upon the hooks. All this meat had come into the market that morning and would be out of it by three that afternoon! Such is the meat-consuming power of Greater London. One of the secrets of the expedition's handling of meat is the Great Western Railway's depot which immediately below the market, obviating the carting of meat through the streets. Access from the depot to the market is by two hydraulic lifts, each capable of 150 tons of beef can be cleared every hour. Every facility was afforded for asking questions of the market, both meat and fruit and vegetable, and a mass of information was obtained having a direct bearing on the marketing of Canadian products.

After three hours of tireless investigation, we were ready for the reception of the reception of the Lord Mayor and Lady Mayoress, Sir Charles and Lady Batho. In this imposing house, where since the 18th century the Lord Mayors of London have received kings, princes, statesmen and other representatives from all over the world, we were given a cordial welcome and made to feel at home. During a pleasant and privileged half hour we were shown the old kitchen with the hearth on which used to be roasted barons of beef, entertained in the great Egyptian Hall, and accorded a view of the City's gold plate.

Leaving the Mansion House with some regret at the shortness of the stay, we made the brief walk to the Guildhall as guests of the Central Markets Committee.

We entered the Guildhall with a feeling akin to reverence. If London is the heart of the Empire, the Guildhall is the heart of London. It has been the centre of alluring episodes throughout many centuries and the pillars of the Great Hall which were licked by flames to a height of thirty feet, still bear the marks of the Great Fire of London. Here the great images of God and Magog are still to be seen, and in this room, on July 29th, 1915, Sir Robert Borden was accorded the Freedom of the City of London, and tribute was paid to the gallant and tenacious defence of the Canadian Force in the Second Battle of Ypres.

Our luncheon table was set in the famous Art Gallery, a colorful surrounding of rare historic and rich artistic interest. It was fitting that the centre of alluring episodes throughout many centuries and the pillars of the Great Hall which were licked by flames to a height of thirty feet, still bear the marks of the Great Fire of London. Here the great images of God and Magog are still to be seen, and in this room, on July 29th, 1915, Sir Robert Borden was accorded the Freedom of the City of London, and tribute was paid to the gallant and tenacious defence of the Canadian Force in the Second Battle of Ypres.

afternoon to a session with representatives of the Provision and Grain Trades of London, under the auspices of the London Chamber of Commerce. Here we listened to plain talk on both sides which brought forth information of the greatest value. An evening play concluded with an evening at Drury Lane, the largest and most famous of London's theatres, where we saw "The Desert Song," one of the most successful musical shows ever presented in London. (To Be Continued.)

Subject Much Neglected

More Music Should Be Taught Children At School

More time might well be devoted to the study of singing in the schools. Music is an art that enables many a person to endure much that is unpleasant in life, because when opportunity affords, the mystic music compensates for everything else which involves a dissonance. Music makes for happiness and pleasure. It brings to the front the better elements in our lives and suggests the doing of pleasurable things, rather than those that are contrary. The more music the better the children, the easier managed, and the nobler the ideals encouraged.

Heavy Wool Controls

Increase Of 35 Per Cent. Shown Over Last Season

Wool controls received by the Canadian Co-operative Wool Growers to date, show an increase of 25 per cent. over last season, according to W. W. Thompson, manager for Saskatchewan and Manitoba. More than 1,500 wool sacks have been sent to prospective buyers in the two provinces in question and another shipment of equal size is expected before the middle of June. The 3,000 bags would represent about 600,000 pounds of wool and does not include the 200,000 odd pounds of range wool marketed through the Association at Maple Creek.

Indians Make Big Profits

Found Seal-Fishing Good Along West Coast Of Vancouver

Fur seals have been unusually plentiful this season along the west coast of Vancouver Island, and the Indians, to whom pelagic sealing is permitted if guns are not used, have brought in a large number of skins for sale. The price is high and some of the hunters have been making big profits.

The weather was stormy at times, and the Indians, in the frail dugout canoes, had no easy time during the hunt, but are well pleased as the salmon fishing has not been any too good owing to the rough seas.

Would Suit the Boys

Old French Manual Advised Against This From A French manual for the guidance of youth, first published in 1713, which ran through 50 editions in the course of the Eighteenth Century. "For the sake of cleanliness it is well to rub the face every morning with a white towel in order to remove the dirt. It is not advisable to wash with water, for this exposes the face to the chills of winter and the heats of summer." A similar work published in 1667, warns children that "to wash the face in water injures the eyesight, brings on toothaches and colds, and engenders potholes."

On Victoria Day, Premier Mackenzie King gave a broadcasted message from Ottawa to a 100,000 crowd assembled in Hyde Park, London, England, and a little later High Commissioner Larkin telephoned from the British metropolis to exchange greetings with reference to the incident. Either event would have been regarded as a miracle not so very long ago, yet the two combined scarcely caused a ripple of public attention, so used have we become to modern marvels.

The trouble about worshipping ancestors is that people who do it seldom provide the same privilege for posterity.

"What is the matter with you?" "I had a difference of opinion with Brummage, but he brought me round to his viewpoint."—Nagels

Reduce the Acid

Sick stomachs, sour stomachs and indigestion usually mean excess acid. The stomach nerves are over-stimulated. Too much acid makes the stomach and intestines sour.

Alkali kills acid instantly. The best form is Phillips' Milk of Magnesia, because it is harmless, tasteless, does not neutralize many times its volume in acid. Since its invention, 50 years ago, it has remained the standard with physicians everywhere.

Take a spoonful in water and your unhappy condition will probably end in five minutes. Then you will always know what to do. Crude and harmful methods will never appeal to you. Go prove this for your own sake. It may save a great many disagreeable hours.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

PAINTED FIRES

NELLIE L. MCCLUNG

Copyright, Canada, 1925

CHAPTER XXVI. Continued.

When they were in the car, Maudie finished the conversation. "Helmi is doing well, but don't fuss her up by taking her out. They get to know too much. Now Mrs. Bell when she spoke to me said I would have to get some one to wash; Helmi wouldn't be able to do the washing, especially the hanging out of the clothes, on account of nursing her baby—she might catch cold. But Bob, she does it and washes beautifully. I just kept quiet. So we're saving two dollars a week there. Now, how's that? Am I a good wife for a poor man? I'll say I am. Those foreign girls are strong as horses. Well, she's good to the baby, anyway, but don't spoil her, for Heaven's sake. The more you do for people the more they expect—take it from me!"

To which Mr. Herriott replied: "I bet she'd like a ride, though; she's only a kid. She's younger than you are, and I think she looks pretty pale and tired sometimes."

"Look here," said his plump little wife, asserting her dignity. "Who is running the house?"

And when she said it she looked so utterly sweet and plump and pink and white, so much like a spoiled but very pretty child, that her husband kissed her and forgot all about Helmi.

Helmi had a friend in the bread man, who gave her snatches of news from the outside world. The soldiers from out at the Exhibition Grounds were going away soon. They would go direct to England, to Salisbury

How Much Water Should Baby Get?

A Famous Authority's Rule

By Ruth Brittain

Baby specialists agree nowadays, that during the first six months, babies must have three ounces of fluid per pound of body weight daily. An eight pound baby, for instance, needs twenty-four ounces of fluid. Later on the rule is two ounces of fluid per pound of body weight. The amount of fluid absorbed by a breast fed baby is best determined by weighing him before and after feeding for the whole day; and it is easily calculated for the bottle fed one. Then make up any deficiency with water.

Giving baby sufficient water often relieves his feverish, crying, unrest and restless spells. If it doesn't, give him a few drops of Fletcher's Castoria. For these and other ills of babies and children such as colic, cholera, diarrhea, gas on stomach and bowels, constipation, sour stomach, loss of sleep, underweight, etc., leading physicians say there's nothing so effective. It is purely vegetable—the recipe is on the wrapper—and millions of mothers have depended on it in over thirty years of ever increasing use. It regulates baby's bowels, makes him sleep and eat right, enables him to get full nourishment from his food, so he increases in weight as he should. With such advantage you get a book on Motherhood worth its weight in gold.

Just a word of advice. Look for the signature of Chas. H. Fletcher on the package so you'll be sure to get the genuine. The forty cent bottles contain thirty-five doses.

W. N. U. 1739

will do for Lili, so cut out all the fireworks and get them ready."

Plump and pink and white, with a baby smile, was Maudie Herriott, the petted child's wife, but hard and cruel as any toothless old crone.

Both mothers rode in the ambulance to the hospital, and, strangely enough it was Mrs. Herriott who became hysterical when the nurse took her baby from her.

The brown-eyed nurse who had received Lili read the nurse in Helmi's white face, and patted her shoulder kindly. "I do not think your baby will have any very hard—she is a lovely little thing and looks quite strong. Don't worry over her, because we have splendid success with our babies here. She will have every care, I promise you. No, she will not fret much."

Helmi kissed her hand with a rapt look in her eyes, but she could not speak. Her heart would have broken when she saw Lili carried into the fever ward—away from her, with a door shut between them, if the kindly touch of the nurse's hand had not been laid on her shoulder. The bandage was warm, human and strong, and its touch went with her when she went down the dark stairs to the ambulance which waited at the door.

Mrs. Herriott was weeping violently, but Helmi sat tight-lipped and pale, but fearless. The red cross on the frosted glass of the ambulance door held her eyes with gruesome fascination; to her excited imagination it seemed as if it were painted with blood.

When returning they were stopped at First Street by the closing of the black and white gates, for the afternoon train was going out—a special, carrying the soldiers. The station platform swarmed with people, and a band blared its music. Helmi hated the sound of it. How could any band play when there was so much trouble in the world and her Lili so sick? Once when she was a child at home she had drawn her hand across the plastered wall, and some of the plaster had caught below her finger nails, making her sick with a horrible sense. The band music brought the feeling back to her again.

There were flags on the train, hanging out of the windows, fluttering like little red wounded things lying at the side of the car with red tongues. Helmi shivered as she watched them. From the windows of the ambulance she could see the swarming crowds, but the train hid from her view the farewell scenes. As the train moved slowly out, Helmi could see the faces gliding past her. Most of the soldiers were at the windows on the side next the station platform, waving to friends. Just as the last car went by, gathering up speed now, one man sat moodily looking out of the north window with eyes that saw nothing. Helmi from where she sat in the ambulance was no more than six feet from him as he passed. When his face came into view, she bent upon the glass like a man thing, screaming: "Jack! Jack! look at me!" But though she saw him so plainly, he did not see her, and the train went on its way. Helmi's voice, like the sobbing of many others, was lost in the blare of the bands.

(To Be Continued.)

Three-In-One Machine

Tourists of the future will be able to use the same conveyance for travel by land, water or air if a British craft, recently exhibited, proves successful. It is a combination automobile, motorboat and aeroplane with wings that fold back, tail fin, rudder and two propellers. A sheltered cabin holds several passengers and a little time is needed to change the vehicle for different modes of travel.

Of course the fittest survive, as Darwin said. We're all here, aren't we?

"HELPED ME WONDERFULLY"

Woman Strengthened by Taking Lydia E. Pinkham's Vegetable Compound.

Port Colborne, Ont.—"After having an operation, I was very miserable. I was weak, nervous and very near unfit to work. I saw Lydia E. Pinkham's Vegetable Compound advertised and tried it and believe it helped me wonderfully. I have no more pain, my nerves are much better. I feel as if I had been reborn."

In saying Lydia E. Pinkham's medicine has helped me wonderfully, Mrs. W. H. Herriott, Box 143, Port Colborne, Ont.

When Capt. Malcom Campbell completed his world's record automobile drive at Daytona Beach, his first request was for a cup of "good, strong tea." The courageous captain would have enjoyed Red Rose Tea because it is a blend of choicest Assam and Ceylon teas, whose characteristics above all others are strength and flavor, packed by men trained in the London tea market. Sold by your grocer in clean, bright aluminum packages.

Dog Discovers Valuable Mine

Strange Incidents Recalled In Connection With Mineral Discoveries

One of the richest copper strikes on Vancouver Island was made by a dog, according to Harry Tanner, well-known mining man, who has just returned from a prospecting trip.

Tanner's dog was a companion on one of his trips and sought to rival his master in the discovery of "float." One day on the West coast of Vancouver Island, Tanner heard his dog barking persistently and went to see what it was about. To his astonishment he found the dog scratching around a rich out-crop of copper ore which development proved to be one of the richest strikes on the island.

The story of the donkey which discovered the famous Bunker Hill and Sullivan mine in the Coeur d'Alene Idaho district, has often been told. That donkey was rewarded for its life as its reward. Several mineral discoveries have been made as the result of float found on the dumps and holes dug by bears in their search for groundnuts. The despised pack-trail has proved to be one of the best prospectors, and many a miner has told how his stake was saved by a pack-trail leading him to a pocket of rich ore.

For Catarrh.—It is one of the chief recommendations of Dr. Thomas' Eucalypti Oil that it can be used internally with as much success as it can outwardly. Sufferers from catarrh of the bladder or the prostate gland according to directions will give prompt relief. Many sufferers from this ailment have found relief in the Oil and have sent testimonials.

The Unseen World

Many Things In Air Which Mean Nothing To Us

"A learned professor tells us," says a writer in The Outlook, "that sound is not even a child's quick ear can detect, but which run into the water of an aquarium, will stun and kill small fish. An earthworm can hear well below the soil the tread of a thrush above, and so keep out of harm's way. You may see a slug in a poney bed, but can you hear it munching away as it makes meal? There is many a quiver in the air that means nothing to us, but has a message for the insect or the bird. Since the beginning of time electrons have rushed through the ether at the speed of 186,000 miles a second, but we never knew of their existence until ten years ago, when 'wireless' revealed it. What more remains in a world unknown to human senses?"

Unless worms be expelled from the system, no child can be healthy. Mother Graves' Worm Extirminator is an excellent medicine to destroy worms.

Less Law and Best Judges

In Britain, the fact that the courts are humanized; in United States, the secret of frequent judicial inefficiency is the fact that the courts have been mechanized. Britain has the minimum of law and the maximum of judicial sense. United States has the maximum of law and very often the minimum of judicial sense. In Canada, we want humanized courts, not mechanized ones. We want less law and the best judges—Vancouver Sun.

Makes First Appearance

For the first time in Europe a standard-sized newspaper recently supplied its readers with a photograph section in color, the section of four pages being issued by the Paris Herald, European edition of the New York Herald Tribune. By coincidence, it is almost thirty years ago since the Paris Herald introduced the first linotype machine used in France.

A reliable antiseptic—Mandarin's.

Teeth and Health

Issued By The Canadian Dental Hygienic Council and Published By The Saskatchewan Dental Society

GREENSTAIN

You are anxious that your child should have nice white teeth, and you are endeavoring to get him to form the habit of daily care with perhaps good success.

But you notice a dark greenish stain on his teeth right next to the gum, and which persists in spite of careful brushing.

This, then, is "greenstain," and is commonly found on both the temporary and permanent teeth of children, being generally confined to the interior upper teeth, well up towards the gums.

The greenish color is due to bacteria present which find lodgment in those areas afforded by the remnant of a dead cuticle which often persists after the eruption of the tooth.

Where "greenstain" is permitted to remain for a considerable time upon these surfaces, the enamel will be found to be "etched" or roughened by dissolution due to an acid which these bacteria produce. Unfortunately, this injury to the tooth substance is permanent.

Now, you can readily understand that these roughened areas will hold food particles and epithelial matter such as are found in a mouth where brushing is neglected—and with resultant decay.

The removal of greenstain had better be left to your dentist, who, by employing some abrasant such as pumice, would be able to smooth and polish these areas and thus check further deposit of this nature.

So, not only, as you see, should greenstain be removed for appearance sake, but also as a prophylactic measure in the prevention of decay.

Little Helps For This Week

"But I would not have you to be ignorant, brethren, concerning them which are asleep, that ye sorrow not, even as others which have no hope."

—Thess. iv. 13.

Somewhere is comfort, somewhere faith.

Though there in outer dark remain: One sweet, and voice embodes death. And still for eighteen centuries saith softly, "Ye meet again."

Those who are gone you have. Those who departed loving you, love you still; and you love them always.

They are not really gone,—those dear hearts and true,—they are only down the next room; and you will presently get up and follow them, and yonder door will be closed upon you, and you will be no more seen.

—William Makepeace Thackeray.

China's Penalty For Speeders

Pekin, China, is making its campaign against speeders effective. After beheading some of the chauffeurs who exceeded the 15-mile speed limit, officials hung the heads in boxes at street intersections and over their placed signs in English and Chinese calling attention to the law and the consequences to those who ignored it.

Minard's Liniment for Insect bites.

Distributing Free-as-for Eggs

The Calgary Fish and Game Association is distributing 2,000 pheasant eggs throughout the province with instructions to recipients on how to handle them, so as to avoid any loss of chicks.

The Handsome Conductor—You'll have to transfer at Belvedere.

The Pretty Passenger—"What time does this train reach Belvedere?"

Railway engines are said to make full use of only five per cent. of the heat generated in their boilers.

NO NEED FOR STOUTNESS

MAIGRIR is the correct method of securing fat reduction—a guaranteed harmless and effective remedy. Does NOT contain "HYPO" or any other injurious drugs. Use this marvelous remedy in any quantity you desire. It is sold by mail only, postpaid in Canada. Price \$1.00 per box, or 5 boxes for \$5.00. Write:

More Deadly Than Disease

Motor Cars Kill Thousands Of Children In New York

Nearly 2,000 children under 15 years of age have been killed by motor cars on the streets of New York during the last five years, according to figures made public by the health department. Three times as many boys as girls were victims.

Health Commissioner Harris said that in this city deaths caused by automobiles are more numerous than those due to diphtheria, scarlet fever, and typhoid combined.

GREAT HELP TO YOUNG MOTHERS

Baby's Own Tablets Have Many Uses and Are Absolutely Harmless

To have in the house a simple, harmless remedy for the minor ills of babies and little children is a great boon to the mother. This is exactly why Baby's Own Tablets have been found in thousands of households. The Tablets regulate the stomach and bowels, break up colic and simple fevers, allay the irritation of cutting teeth, yet they have no drug taste and the children like them.

Concerning the Tablets Mrs. Ruthven Crommiller, Rutten, Ont., writes:—"Kindly send me your little book on the Care of the Baby. I have two children, one four years of age and the other a year and a half. Both are in excellent health and the only medicine they have had is Baby's Own Tablets. I always keep the Tablets in the house and am happy to recommend them to other mothers."

Baby's Own Tablets are sold by all medicine dealers. By mail at 25¢ a box from The Dr. Williams' Medicine Co., Brockville, Ont.

An Obvious Fact

It must be obvious to anyone familiar with agriculture that the farmer who is lacking in energy, enterprise, judgment and courage will rarely extract more than a fair living from the soil, says a commentator in Farm and Fireside.

Time Has Tested It.—Dr. Thomas' Eucalypti Oil has been on the market upwards of fifty years and in that time it has proved a blessing to thousands. It is in high favor throughout Canada and its excellence has carried its fame beyond the seas. If it were double the price it would be a cheap liniment.

Counsel (severely): Please remember that you are on oath. You understand the nature of an oath, do you not?"

Girl Witness (brightly): "Profane, isn't it?"

Athletes.

For sprained ligaments, bound muscles, aches and bruises—use Minard's.

MINARD'S "KING OF PAIN" LINIMENT

HERCULES

PERMANENT BUILDING PAPER

IT TAKES A SHARP BLADE

Healthy beards can be removed most easily with a sharp blade. So, too, can Hercules Permanent Building Paper be cut. It doesn't tear easily.

For this reason alone, carpenter and builders prefer Hercules. When using Hercules as roughly as you like, Hercules will not tear or crack. Hercules allows greater speed in using.

For various purposes, Hercules is made in three grades—x light, x medium, x heavy. All grades are tested and proven wind proof and damp proof. A sample gladly sent on request.

IN pursuing its policy of consistent progress—in its continual search for new ideas... in its constant development of better cars... General Motors not only maintains its great International Research Laboratories and hundreds of skilled engineers, but also operates the first, largest and most completely equipped automobile proving ground in the world.

Here, on the vast fourteen-hundred-acre tract of the General Motors International Proving Ground, every type of road is duplicated, every condition of driving is

reproduced. Here all makes of General Motors cars are constantly being subjected to the most searching tests. Here every principle developed by General Motors engineers is put to proof... every detail of each test car's performance carefully and closely checked. Here years of normal use are crowded into a few months of continuous, grueling operation.

A typical example is offered by Chevrolet. Since the opening of the General Motors Proving Ground, Chevrolet cars alone have piled up over three million miles of

testing... a distance equal to 125 times around the world.

In the countless millions of miles that General Motors cars have covered on the General Motors Proving Ground, there has been one great purpose kept in view... to improve, by constant testing, the quality and worth of every General Motors product.

Every Canadian buyer of a General Motors car gets a car built in Canada by Canadians to meet Canadian conditions of road and climate... a better car and a greater value because General Motors uses so freely and unsparsingly its unequalled facilities for testing and research...

With better General Motors cars at the end of the journey, millions of miles is not too far to go.

The home of Mr. and Mrs. O. Steffen was saddened Thursday of last week when their son which was born Tuesday passed away. The funeral was held at Irma Sunday. Mr. and Mrs. Steffen have the sympathy of a host of friends in their hour of grief.

Rev. M. L. Wright motored to Wainwright Tuesday evening to give the address to the minister at the induction of Rev. Norman Whitmore into the Wainwright charge. The induction service was presided over by the Rev. R. H. McPherson of Halden. The address to the congregation was given by Rev. J. Woodliff of Edgerton. Rev. Hiram Sykes of the Presbyterian church, Wainwright led in prayer.

Wainwright sports and circus did not prevent a goodly number from attending the picnic at Roseberry. The sports were many and varied and well managed. Supper was served cafeteria style by the ladies who greeted everyone with a cheerful word and a smile. The booth was liberally patronized and old and young enjoyed themselves. If you want a good time go to Roseberry.

SUMMERFALLOW

The primary objects of summerfallow are to conserve moisture, kill weeds, make plant food available, and by lighten the spring work by preparing land for the following year.

The conservation of moisture, killing of weeds, and making plant food available are all promoted by the same treatment within certain limits. This limit is excessive cultivation which is necessary to eradicate certain perennial weeds but which render the soil more liable to blow and, to some extent, sacrifices plant food.

The method of summerfallowing which has proven most successful at the Rosthern Station, where annual weeds are present, is shallow cultivation in the fall or early spring, either by plowing, cultivating, or discing, plowing in June or before the weeds have made much growth, and cultivation to keep down weed growth for the remainder of the season. If the weed growth can be kept down until late June or early July by shallow cultivation, it will lessen the need for cultivation after plowing, which often works the soil so fine that it blows readily. On land which tends to blow readily the drag harrow should not be used if it can possibly be avoided after the plowing has been done.

Where only annual weeds are present, a good growth should be allowed to start and then cultivate thoroughly to kill all weeds. If a cultivator or rod weeder is used for this work it will be necessary to go over the land only two or three times and the soil on the surface will be left in a lumpy condition which will aid in checking soil drifting. If perennial weeds are to be contended with, cultivation should be frequent enough to prevent them forming leaves, in order to starve the roots. Where much grass is present more thorough cultivation still may be required, as the roots of this weed may have to be worked out of the soil. Plowing should also be earlier where perennial weeds are to be killed.

In summerfallowing where only the ordinary annual weeds are to be contended with the general principle is to keep down the weed growth with cultivation, as it has been proven that the greatest loss of soil moisture is through the leaves of plants.
